ELGIN

Who We Are

Founded in 1864

Elgin Separation Solutions ("Elgin") has evolved into a world-wide leader in design, manufacture and service of specialized liquid/solids, dewatering, and waste management solutions.

Distributed Service Footprint

Elgin has invested in high-quality, full-service, product support centers in Houston, Texas; Raleigh, Illinois; and Poca, West Virginia to manage your equipment repair needs.

Custom Engineering

Elgin's in-house team of engineers and technicians can custom design complete turn-key systems designed to meet customer needs in finding the ideal solution suitable for any project requirement.

Key Equipment Components

Elgin's line of Apex™ decanter centrifuge's are manufactured with high-quality materials of construction. In addition, premium designed gearboxes, epicentric liquid-end discharge ports, wide-mouth

tungsten carbide solids discharge ports and plows, precision machined heavy-duty pillow blocks, and continuous duty poly-chain driven motors ensure durable, high- performance operation.

Rotating Assembly

By using a length over a diameter ratio of 3.5, Elgin achieves an extremely stable centrifuge.

Premium Gearbox

Planetary gearbox generates an industry-leading speed differential when managing the cut-point and moisture content of discharged solids.

Poly-Chain Drive

Carbon fiber poly-chains are length-stable and can withstand shock loads that frequently lead to belt failure.

Pillow Blocks

Premium bearings installed in precision-machined pillow blocks.

Premium Motors

NEMA premium, continuous-duty explosion proof drive motors.

Hydraulic/Electric Configurations

Elgin can customize centrifuges for electric or hydraulic operations.

Turn-Key Centrifuge Solutions

Elgin specializes in turn-key centrifuge solutions. Whether you are looking for a single unit with telescoping stand, trailer mounted system with dedicated power source and polymer injection system, or a fully containerized dewatering system with dedicated control room for harsh environments, Elgin's team can customize the ideal solution.

Have existing assets? Elgin can incorporate your equipment into a skid, trailer, or containerized platform. Elgin's in-house control panel engineers can design fully integrated controls paired with customers assets to include operational interface, safety interlocks, automation systems, and maintenance protocols.

Turn-Key Solutions Options

- Integrated proprietary HMI touch-screen VFD control system with safety interlocks and alarm notifications.
- Mobile polishing systems built with integrated piping manifold and static inline mixers to achieve maximum residence time when adding polymers.
- Optional onboard sound-attenuated Tier-4 generators ranging from 20KW up to 300KW.
- Dedicated progressive cavity or self-priming feed pump packages.
- Onboard solids discharge screw conveyors or belt conveyor configurations.
- Heavy-duty dual and triple-axle trailer configurations with hydraulic leveling jacks.
- Fully containerized dewatering systems with dedicated control room/mud lab with HVAC system.
- Dedicated fluid tanks with high/low level sensors for operational monitoring.
- Fully designed facilities with detailed layout, electrical schematics, and project planning.
- Complete in-house engineering, 2D & 3D designs with detailing, general assembly drawings, and process flow descriptions.

Assembled as a "field skid" configuration, Elgin's centrifuge systems include onboard control panel and can be easily installed on top of a telescoping stand.

Slim-line unit designs are ideal for placement in small spaces with stand-alone control panel to meet operational needs.

Mobile Polishing Solutions: Built on a heavy-duty dual or triple-axle trailer or 56' dual-axle rock-over trailer, mobile polishing systems include high capacity tanks with level sensors, solids discharge screw conveyor, dedicated progressive cavity feed pump, self-priming transfer pump, onboard sound-attenuated generator and NEMA 7 or NEMA 4X stainless-steel HMI touch-screen VFD control panel.

Containerized Solutions

Elgin can fully integrate a number of processes into a single 20' or 40' standard shipping container. Units include dedicated control room or mud lab, chemical additive injection pumps and tanks, decanter centrifuge, concentrate collection tank, dedicated feed/transfer pumps, and solids discharge conveyor.

Custom Engineered Solutions

Elgin's in-house team of engineers and technicians can incorporate customer's existing assets to build a custom trailer mounted or containerized system for operational needs.

Modular systems can be fully equipped with collection tanks, solids discharge conveyors, polymer injection systems, dedicated power pack, and centralized control system.

Customizable Control Panels

Depending on your budget and performance needs, Elgin's centrifuges can be fitted with a host of custom VFD, FHVD, MVD control options in both explosion proof and non-explosion proof configurations.

Variable Frequency Controlled centrifuges allow the operator to change the centrifuge cut point with the flip of a switch.

**Elgin centrifuges
can be fitted with
a host of custom
VFD, FHVD,
MVD controls**

NEMA 4X Stainless-Steel VFD Cabinet Enclosure with HMI Interface

Class I – Division II Non-Explosion Proof or Class I - Division I Explosion Proof HMI Touch-Screen.

NEMA 7 VFD Enclosure

Class I – Division I Explosion Proof with Active Air Cooling Technology.

NEMA 7X Aluminum Enclosure

Class I – Division I Explosion Proof (ATEX Zone I Panel Available).

VFD Pump Integrated Panel

Onboard control panel with built-in VFD controls for efficient feed pump performance.

NEMA 4X Stainless-Steel VFD with HMI, Air Conditioning, and Purged Air

Monitors the system for extreme temperature with protective interlocks that alerts the operator. Class I -Division I Explosion Proof configuration.

Safety Interlocks

When it comes to optimal operation performance, it is key to integrate safety interlocks to prevent equipment malfunction during operation. Elgin centrifuges are equipped with a host of premium industry-standard safety interlocks.

Vibration Switch

Designed to protect the centrifuge, if excessive vibration occurs during operation.

Thermal Sensors

Onboard thermal sensor monitors pillow block and protects from high temperature damage.

Torque Arm

A trip assembly that prevents over torquing of the gearbox during operation.

Lid Sensor

Safety interlock that shuts down the system in the event the lid is opened during operation.

Emergency Stop

Centrally located E-Stop button to stop operation to prevent system failure.

Active Lubrication System

Onboard active lubrication system provides for continuous lubrication of pillow blocks preventing bearing damage.

Proprietary System Automation

Elgin's proprietary user interface provides complete control of all systems, as well as, a sophisticated set of diagnostic tools, information libraries and fault logs. Control systems include a variety of enhanced features including, internal lighting, ventilation and heating, Ethernet porting for diagnostics and programming updates, and a custom designed

user interface that allows for maximum operating flexibility and control.

Panel upgrades can include onboard Wi-Fi network module allowing for remote operation/monitoring via laptop, tablet or smart phone.

System Alarm Notifications

Safety interlocks built into each system alert the operator when potential system shutdown/damage has or may occur.

Remote Control and Diagnostics

Each user interface comes with the capability of remote control offering the ability to control a centrifuge from great distances.

Data Logging

System performance and operation data tracking storage logs for improving job performance.

'Cruise Control' Automation

Each centrifuge offers automated controls for efficient operation and lower operator oversight.

Maintenance Alerts

Operational alerts notify operator of routine equipment maintenance schedules.

Feed Systems

Having the right pump to feed material to the centrifuge is key to efficient operations. Elgin offers a wide range of pumps perfectly paired with the decanter centrifuge.

Progressive Cavity Pump

PC pumps improve centrifuge performance, extend the life of a centrifuge, and reduce overall operations and maintenance costs when properly operated.

Self-Priming Pumps

Elgin's line of self-priming solids-handling pumps offer a trouble-free, non-clogging design. The large volute automatically reprimed in a fully open system, without the need for complicated suction or discharge plumbing.

Solids Discharge Equipment

Elgin's turn-key solutions are outfitted with sophisticated solids conveyance systems available. This allows the solids separated to be stack-piled or directly deposited into a roll-off waste containment bin.

Screw Conveyors

Available in various length configurations, screw conveyors offer high-performance in moving discharged solids over great lengths.

Belt Conveyors

Belt conveyors efficiently convey material in large volumes. Mounted with optional swivel base and belt wiper for cleaning material off the conveyor.

Centrifuge Product Line

Depending on your operational needs, Elgin has a complete line of high-speed and low-speed decanter centrifuges ranging from 40 gallons per minute up to 550 gallons per minute.

Looking for hydraulically driven centrifuges? Elgin can configure any centrifuge for hydraulic operation.

Apex 16FHD™
Hydraulic Centrifuge

Modular Lubrication System

Elgin has developed a modular centrifuge lube system that provides improved system performance and optimizes centrifuge up-time. Elgin's lube system monitors both flow and temperature and can provide a signal that can be routed back to a central control room. In addition, Elgin's centrifuge lube system provides for an enhanced heat exchanger and expanded 50-gallon capacity lube oil reservoir.

Core Exchange Program

Relative to our commitment to the product life cycle and asset management, Elgin Separation Solutions offers a core exchange program¹.

1-Elgin's Core Exchange Program is restricted to the centrifuge core (rotating assembly). The Customer core submitted in exchange for the Elgin refurbished core shall be submitted to Elgin with full title. The new Elgin core will be provided with a full title. Both Elgin and the Customer shall release all legal ownership of the cores exchanged. Customer cores that have undergone catastrophic damage are not eligible for Elgin's Core Exchange Program. Complete details relative to defining catastrophic damage are available for review. The Elgin refurbished cores shall be provided with standard warranty on parts and workmanship. Additional terms and conditions apply. Contact an Elgin representative for more details.

Global Support

Elgin provides full installation and technical support for all its equipment. With technical support offices in Brisbane, Australia; Edmonton, Canada; Houston, Texas; Raleigh, Illinois; Moscow, Russia; Dubai, United Arab Emirates; and Baroda, India, Elgin can mobilize field technicians within 24 hours to almost

any location in the world. With over 30 year's of experience in centrifuge repair and refurbishment of the industry's most popular decanter centrifuges, Elgin has the largest one-stop-shop service footprint for maintaining your entire centrifuge fleet.

Field Service Technicians

Elgin's technicians specialize in field installation and equipment commissioning for both on-shore and off-shore operations. In addition, technical support is available 24/7 via phone or video chat. Depending on system configuration, our technicians can remote access control panels for troubleshooting and software upgrades.

OEM Spare Parts

Elgin maintains a complete inventory of spare parts and consumables available to ship world-wide ensuring minimal equipment downtime. Additionally, Elgin offers replacement parts for most competitor centrifuges.

Repair/Refurbish Services

Relative to our commitment to the product life cycle and asset management, Elgin has invested in high-quality, full-service, centrifuge repair centers to provide repair, refurbishment and remanufacturing services for your decanter centrifuge fleet.
